

# ADB SAFEGATE FIDS

## PASSENGER EXPERIENCE LIKE NEVER BEFORE

Elevate the airport experience with ADB SAFEGATE's innovative Flight Information Display System (FIDS). Our state-of-the-art product offers exceptional multi-lingual display capabilities and enhanced technical and commercial features, providing unmatched value to airports of all sizes.

With ADB SAFEGATE FIDS, airports can generate non-aero revenue by creating an immersive omnichannel experience from curb to gate, while providing critical flight information and streamlining passenger flow. A real-time display of airlines, arrivals, departures, flight number, flight time and flight status enhances airport efficiency and improves the customer experience.

Our dynamic web-based application boasts advanced features that make it easier and faster to disseminate time-critical flight, regulatory and public service information. Take advantage of the latest technology and transform Smart TVs into stunning digital displays with vibrant multimedia output. With cost-effective monitoring and maintenance from a centralized remote location, ADB SAFEGATE FIDS is ideal for cloud deployment. Experience the ultimate in multi-utility signage with ADB SAFEGATE FIDS – the preferred choice for airports seeking premium quality and unrivaled innovation.

### HOW DOES ADB SAFEGATE FIDS WORK?

- 1** FIDS provides real-time information such as weather, aircraft arrival, boarding and other details specific to a particular gate, and can inform passengers of delays, gate changes and upgrade lists.
- 2** BIDS relays carousel numbers for passengers to collect their bags and can be used to help handlers deliver baggage more efficiently.
- 3** FIDS installed in terminal stores allows customers to shop longer by helping them monitor time before boarding, which increases customer satisfaction and supports revenue growth for airports.
- 4** FIDS can be used to create dynamic opportunities for advertising in public concourses, retail shops and food courts.
- 5** In case of an emergency, FIDS can display alerts or visual paging to help keep customers calm and avoid chaos situations at airports.

# ADB SAFEGATE FIDS

## Enhanced performance

### Clustering

ADB SAFEGATE FIDS provides state-of-the-art clustering capabilities for uninterrupted delivery of essential information to customers. Passengers can rely on its ability to provide them with accurate and relevant information at all times, improving the overall customer experience.

### Advertising

Airports can take advantage of prime advertising opportunities using eye-catching images and videos. This feature ensures that advertisers can capture the attention of their target audience and maximize the value of their investments.

### Emergency overrides

Emergency override capabilities provide effective dissemination of critical information during unforeseen events. Page content can be instantly replaced with essential information such as emergency evacuation instructions or severe weather alerts.

## KEY FEATURES AND BENEFITS:

### Productivity

- The solution delivers maximum productivity gains with minimum user interaction. Enjoy peace of mind as you operate with greater ease and efficiency than ever before.

### Enhanced passenger experience

- Look no further than ADB SAFEGATE FIDS for strong airport infotainment capabilities and a smart wayfinding solution that guides passengers throughout the airport. Our solution is designed to enhance the passenger experience at every .

### Flexible deployment

- Our web-based, cloud-hosted solution provides quick and easy deployment options, making it ideal for airports of all sizes. Benefit from a range of hosted and managed service options that suit your specific needs.

### Cost savings

- Save on running costs with our solution that maximizes automation, centralizes remote monitoring and minimizes demand on staff and customer service. Routine preventive maintenance and non-interruptive upgrades also guarantee continued savings and higher ROI.

### Faster turnarounds

- Our solution enhances turnaround times, reducing missed flights and transfers. Say goodbye to delays and hello to on-time performance with ADB SAFEGATE FIDS.

### Generate extra revenue

- Our solution monetizes screen real estate and drives traffic to cafes and shops via smart digital ads, resulting in extra revenue generation opportunities.
